

Realise Your Business Value with Workday

Workday offers a wide range of post-deployment services to help customers maximise and increase the value in their investment. We have a broad mix of standard and premium services tailored to meet your needs—whether you are planning to roll out new technology, looking to enhance current configurations, or just trying to determine whether a particular product feature is the right fit.

As Workday customers look to expand their feature footprint, they may want or need various levels of assistance to accelerate feature deployment. Jumpstart Services is designed for customers who may have the resources in house to actually configure Workday and want to work with a seasoned, internal consultant to review and validate product fit and to outline high-level feature design.

Jumpstart Services

Jumpstart Services are fixed-price packaged services designed to help customers efficiently and effectively extend their deployment with new product features and functionality. During a Jumpstart, Workday helps a customer to understand the full range of choices or options available to them and to develop a deployment plan specifically tailored to their needs.

Post-Deployment Services

Value

- Focused on your success - not just on go-live or buying the next module
- Ease adoption of new Workday capabilities to realise and increase value
- Deep expertise where and when you need it
- Learn and grow your own expertise with our help

What We Do

Through a series of interviews, demonstrations, and structured workshops with key project team members and stakeholders, we will:

- Demonstrate and explain key product features
- Document requirements and confirm product fit
- Recommend a deployment approach tailored for your needs
- Provide estimates and high-level timelines for implementation
- Deliver a Design Decision Guide documenting decisions made and next steps

Delivery Approach

Jumpstart Services are short, one- or two-week engagements delivered in three distinct stages:

- **Stage 1:** Discovery sessions to understand requirements and business needs
- **Stage 2:** A two-day onsite workshop that includes demonstrations of features and function
- **Stage 3:** Presentation of findings, including deployment approach and time/hours estimates

Feature Areas

Fixed price packages are currently available for the following feature areas*:

- Talent Management without Performance Management
- Talent and Performance Management
- Compensation Events
- Analytics
- Job Change
- Onboarding

* Please note: Workday applications are continuously evolving, and our Jumpstart Services will evolve along with them. For a current list of all feature areas available as a Jumpstart Service, or to determine if a Jumpstart Services package is right for you, visit the Enablement Services page on Community, <https://community.workday.com/node/45007>, or contact us directly at customer.enablement@workday.com.
